LIST OF CONTENTS

NUMBER 1

Noel D. Uri	1	A reconsideration of effect of energy scarcity on economic growth
Jong Chan Choi and **Sang Done Kim**	13	Heat transfer in a latent heat-storage system using $MgCl_2 \cdot 6H_2O$ at the melting point
Darwin C. Hall, M. Sandii Win, and **Jane V. Hall**	27	Air pollution impacts from demand-side management
Mark D. Levine, Jonathan G. Koomey, Lynn Price, Howard Geller, and **Steven Nadel**	37	Electricity end-use efficiency: experience with technologies, markets, and policies throughout the world
R. Ramanathan and **L. S. Ganesh**	63	Energy alternatives for lighting in households: an evaluation using an integrated goal programming–AHP model
Sibel Özdoğan and **Mahir Arıkol**	73	Energy and exergy analyses of selected Turkish industries

NUMBER 2

Vincent J. Forte, Jr., Robert Putnam, Jr., Roger L. Pupp, and **Chi-Keung Woo**	81	Using customer outage costs in electricity reliability planning
Roger Pupp, Chi-Keung Woo, Ren Orans, Brian Horii, and **Grayson Heffner**	89	Load research and integrated local T&D planning
Joseph E. A. Roy-Aikins	95	Cogeneration in rural development
Alan Meier and **Barry Solomon**	105	The EPA's protocols for verifying savings from utility energy-conservation programs
Xiaoke Wang and **Zongwei Feng**	117	Atmospheric carbon sequestration through agroforestry in China
N. E. Wijeysundera	123	Analysis of the ideal absorption cycle with external heat-transfer irreversibilities
Andy S. Kydes, Susan H. Shaw, and **Douglas F. McDonald**	131	Beyond the horizon: recent directions in long-term energy modeling

R. Friedmann, O. de Buen, J. Sathaye, A. Gadgil, R. Saucedo, and G. Rodriguez — 151 Assessing the residential lighting efficiency opportunities in Guadalajara and Monterrey, Mexico

G. Bisio — 161 Thermodynamic analysis of the use of pressure exergy of natural gas

NUMBER 3

Walter Seifritz — 169 Systematics in bifurcations of exponential growth equations with a non-linear feedback

Terrence G. Bensel and Elizabeth M. Remedio — 173 Residential energy use patterns in Cebu City, Philippines

Joseph C. Lam — 189 Building envelope loads and commercial sector electricity use in Hong Kong

Ram M. Shrestha and Gopal B. Bhattarai — 195 Utility planning implications of efficient electric cooking in a developing country: case of Nepal

S. A. M. Said, Y. M. Suleiman, and B. Ismail — 205 Theoretical performance of HCFC123 as an alternative to CFC11

N. Tully — 209 The influence of electrical backup element size on the performance of a solar thermosyphon DHW system

J. P. Painuly, Hemlata Rao, and Jyoti Parikh — 219 A rural energy–agriculture interaction model applied to Karnataka State

V. S. Stepanov — 235 Chemical energies and exergies of fuels

Yang Zhao, Ma Yitai, and Lu Canren — 243 A heat-pump system for heat recovery at a substation

Matthew B. Richards — 247 The U.S. DOE strategy for permanent disposal of commercial LWR, spent nuclear fuel

NUMBER 4

Benjamin F. Hobbs and Paul Centolella — 255 Environmental policies and their effects on utility planning and operations

J. H. Horlock — 273 Electricity pricing—a discussion of discounting methods

Robert D. Perlack and Lynn L. Wright — 279 Technical and economic status of wood energy feedstock production

B. K. Bala and J. L. Woods — 285 Optimization of natural-convection, solar drying systems

M. J. E. Verschoor and E. P. Brouwer — 295 Description of the SMR cycle, which combines fluid elements of steam and organic Rankine cycles

Jincan Chen and **Chih Wu** 305 Maximum specific power output of a two-stage endo-reversible combined cycle

S. S. Penner and **A. L. Berlad** 311 Fundamental combustion research in support of industrial applications

Y. Tamaura, A. Steinfeld, P. Kuhn, and **K. Ehrensberger** 325 Production of solar hydrogen by a novel, 2-step, water-splitting thermochemical cycle

NUMBER 5

COMMERCIALIZATION OF FUEL CELLS

S. S. Penner, A. J. Appleby, B. S. Baker, J. L. Bates, L. B. Buss, W. J. Dollard, P. J. Farris, E. A. Gillis, J. A. Gunsher, A. Khandkar, M. Krumpelt, J. B. O'Sullivan, G. Runte, R. F. Savinell, J. R. Selman, D. A. Shores and **P. Tarman** 331 Commercialization of fuel cells

NUMBER 6

Mary Ann Piette, Bruce Nordman, Odon de Buen, and **Rick Diamond** 471 Findings from a low-energy, new commercial-buildings research and demonstration project

M. Yaqub, Syed M. Zubair, and **Shamsul Hoda Khan** 483 Second-law-based thermodynamic analysis of hot-gas, by-pass, capacity-control schemes for refrigeration and air-conditioning systems

Y. Berbash, M. Chandrashekar, and **P. Calamai** 495 Technology for sustainable development: a case study of solar domestic hot water heating in Ontario

Rakesh Kumar, S. C. Kaushik, and **H. P. Garg** 511 Analytical study of collector solar-gain enhancement by multiple reflectors

David A. Blank and **Chih Wu** 523 Power optimization of an extra-terrestrial, solar-radiant Stirling heat engine

Piyush Tiwari and **Jyoti Parikh** 531 Cost of CO_2 reduction in building construction

N. C. Gupta, V. K. Jain, and **N. K. Bansal** 549 CO_2 reduction potential through non-conventional energy sources in India

M. A. Habib, S. A. M. Said, and **I. Al-Zaharna** 555 Optimization of reheat pressures in thermal power plants

M. Bayramoglu and **A. T. Bulgan** 567 Sensitivity analysis of an aqua-ammonia-absorption refrigeration system (AARS)

Altuğ Şişman and **Hasbi Yavuz** 573 The effect of Joule losses on the total efficiency of a thermoelectric power cycle

V. S. Stepanov 577 A method for estimating the energy efficiency of the economy

Note

Folorunsho O. Akinbode 585 Energy utilization in the clay and pottery processing industries in Nigeria

Comment

Bert Bolin 589 Comment on "Atomospheric residence time and the carbon cycle" by C. Starr

Author's Reply

Chauncey Starr 591 Author's Reply

NUMBER 7

Barry Hyman and **Tracy Reed** 593 Energy intensity of manufacturing processes

R. Domanski, A. A. El-Sebaii, and **M. Jaworski** 607 Cooking during off-sunshine hours using PCMs as storage media

Dewey Seeto, Shu-Dong He, and **Chi-Keung Woo** 617 Pricing electric harmonics

Selahattin Göktun 623 Selection of working fluids for high-temperature heat pumps

Jonathan G. Koomey, Camilla Dunham, and **James D. Lutz** 627 The effect of efficiency standards on water use and water-heating energy use in the U.S.: a detailed end-use treatment

G. Cannistraro, C. Giaconia, M. Pietrafesa, and **G. Rizzo** 637 Reduced weather data for building climatization and application to 29 European locations

Y. June Wu and **J. David Fuller** 647 Introduction of geometric, distributed lag demand into energy-process models

K. K. Gopinathan and **Alfonso Soler** 657 Diffuse radiation models and monthly-average, daily, diffuse data for a wide latitude range

Feng Liu, Marc Ross, and **Shumao Wang** 669 Energy efficiency of China's cement industry

T. K. Das and **S. Banerjee** 683 Energy technology choice in rural India

Emad Al-Regib and **Syed M. Zubair** 687 Transient heat transfer through insulated walls

Jean P. Murray, Aldo Steinfeld, and **Edward A. Fletcher** 695 Metals, nitrides, and carbides via solar carbothermal reduction of metal oxides

Horace Herring	705	Electricity use in minor appliances in the UK
	I	Corrigendum

NUMBER 8

Falong Yan	711	Urban household-electricity use in China
Süleyman Özkaynak	715	Maximum power operation of a solar-powered heat engine
Lin Wenxian, Gao Wenfeng, Pu Shaoxuan, and **Lu Enrong**	723	Ratios of global radiation on a tilted to horizontal surface for Yunnan Province, China
Marilyn A. Brown and **Linda G. Berry**	729	Determinants of program effectiveness: results of the national weatherization evaluation
M. Tiris, C. Tiris, and **İ. E. Türe**	745	Diffuse solar radiation correlations: applications to Turkey and Australia
S.-M. Lu, R.-J. Shyu, W.-J. Yan, and **T.-W. Chung**	751	Development and experimental validation of two novel solar desiccant-dehumidification-regeneration systems
A. Mourelatos, D. Assimacopoulos, and **L. Papayannakis**	759	Economics of energy-conservation measures in Greece
G. C. Aggarwal	771	Fertilizer and irrigation management for energy conservation in crop production
Wu Zongxin and **T. A. Siddiqi**	777	The role of nuclear energy in reducing the environmental impacts of China's energy use
K. A. Antonopoulos and **C. Tzivanidis**	785	Time constant of Greek buildings
Martin Flechsenhar and **Christian Sasse**	803	Solar gasification of biomass using oil shale and coal as candidate materials
Matthew B. Richards	811	A preferred RAPD-based strategy for permanent disposal of commercial LWR, spent nuclear fuel
Göran Wall, Eugene I. Yantovskii, Lars Lindquist, and **Joakim Tryggstad**	823	A zero emission combustion power plant for enhanced oil recovery
Comment		
N. D. Kaushika and **M. Arulanantham**	829	Comment on "Performance prediction for a triangular, built-in storage-type solar water heater with transparent insulation" by J. Prakash et al
Reply		
J. Prakash	833	Reply

NUMBER 9

Ki-Hong Choi, B. W. Ang, and **K. K. Ro**	835	Decomposition of the energy-intensity index with application for the Korean manufacturing industry
J. P. Huang, K. L. Poh, and **B. W. Ang**	843	Decision analysis in energy and environmental modeling
R. Palumbo, A. Rouanet, and **G. Pichelin**	857	The solar thermal decomposition of TiO_2 at temperatures above 2200 K and its use in the production of Zn from ZnO
M. Tsuji, T. Sano, M. Tabata, and **Y. Tamaura**	869	Enhanced conversion of CO_2 with a mixed system of metal oxide and carbon
S. C. Saxena, N. S. Rao, A. Rehmat, and **M. C. Mensinger**	877	Combustion and co-combustion of auto fluff
Ho-Ming Yeh and **Shyh-Ching Yang**	889	Inviscid isothermal swirling flow in the expanding quarl of industrial burners
Mika Räsänen, Jukka Ruusunen, and **Raimo P. Hämäläinen**	897	Customer level analysis of dynamic pricing experiments using consumption-pattern models
Danny S. Parker	907	Measured air-conditioning and thermal performance of a Thai residential building
Haroon S. Kheshgi	915	Sequestering atmospheric carbon dioxide by increasing ocean alkalinity
J. Mumba	923	Economic analysis of a photovoltaic, forced-convection, solar grain drier
B. Sudhakara Reddy	929	A multilogit model for fuel shifts in the domestic sector
Selahattin Göktun	937	An overview of chlorine-free refrigerants for centrifugal chillers
H.-M. Groscurth, Th. Bruckner, and **R. Kümmel**	941	Modeling of energy-services supply systems

NUMBER 10

Y. Demirel	959	Thermodynamic optimization of convective heat transfer in a packed duct
Jong Min Lee, Jung Soo Lee, Jung Rae Kim, and **Sang Done Kim**	969	Pyrolysis of waste tires with partial oxidation in a fluidized-bed reactor
Amin U. Sarkar and **Serkan Karagöz**	977	Sustainable development of hydroelectric power

Bidyut B. Saha, Elisa C. Boelman, and **Takao Kashiwagi** 983 Computational analysis of an advanced adsorption–refrigeration cycle

Jincan Chen 995 The equivalent cycle system of an endoreversible absorption refrigerator and its general performance characteristics

Luis Giraldo and **Barry Hyman** 1005 Energy end-use models for pulp, paper, and paperboard mills

Ç. Tiris, M. Tiris, and **İ. E. Türe** 1021 Effects of fin design on collector efficiency

M. A. Choudhry and **S. Rahman** 1027 Generic algorithm to select building-lighting technologies for minimizing total harmonic distortion

Bui Tuyen, R. Loof, and **S. C. Bhattacharya** 1037 Small diffusion flames over a wood particle

Ho-Ming Yeh and **Tong-Tshien Lin** 1041 The effect of collector aspect ratio on the collector efficiency of flat-plate solar air heaters

Lingen Chen, Fengrui Sun, and **Wenzhen Chen** 1049 Optimization of the specific rate of refrigeration in combined refrigeration cycles

V. H. Morcos 1055 Performance characteristics of a water-in-oil-fired steam generator for a 300-MW power plant

M. Bojic, N. Lukic, and **K. Trnobransky** 1067 Linear programming applied to an industrial building with several available hot refuse flows

M. Bojic and **K. Trnobransky** 1075 Influence of hot tool parameters on heat recovery in a space-heating and ventilation system

NUMBER 11

B. W. Ang 1081 Decomposition methodology in industrial energy demand analysis

Leif Gustavsson, Pål Börjesson, Bengt Johansson, and **Per Svenningsson** 1097 Reducing CO_2 emissions by substituting biomass for fossil fuels

Krzysztof Labus 1115 Heavy-metal emissions from coal combustion in southwestern Poland

M. A. Habib, S. A. M. Said, and **J. J. Al-Bagawi** 1121 Thermodynamic performance analysis of the Ghazlan power plant

Gregg Marland and **Bernhard Schlamadinger** 1131 Biomass fuels and forest-management strategies: how do we calculate the greenhouse-gas emissions benefits?

O. C. Iloeje, A. N. Ndili, and **S. O. Enibe** 1141 Computer simulation of $CaCl_2$ solid-adsorption solar refrigerator

Klaus S. Lackner, Christopher H. Wendt, Darryl P. Butt, Edward L. Joyce, Jr., and David H. Sharp — 1153 — Carbon dioxide disposal in carbonate minerals
